

RFCOM Technologies Pte. Ltd.

RFCOM Technologies Pte Ltd was founded in 2013 in Singapore. It is a high-tech firm specialized in IoT/M2M communication connectivity hardware and software system integration development by using WiFi, Bluetooth, UHF/RFID, PLC and 2G/3G/LTE standard protocols. Our clients are in Industrial, Aerospace, Electronics and Hotels.

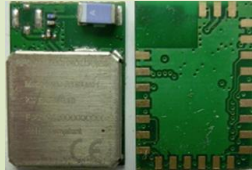

RFCOM is serviced as a design house (IDH) and wireless module maker in Singapore to provide wireless embedded solutions in industrial and aviation applications.

RFCOM Technologies is certified by ISO9001:2015.

Key Products:

RTGM0x series universal GPRS modem board

RTBTM01 BLE v4.1 Module

CPXx series G3 PLC Modem Board

RTM96 CATM1/NB1 modem board

RTM3993 UHF RFID reader modem board

LMS Luggage Tag & Docking Station

Target applications:

- Electrical Meter
- Building Management
- Environmental Monitoring
- Inventory Management
- M2M connectivity
- Healthcare & fitness
- Industrial and home automation
- Hotel Luggage Management

Key Solutions:

- **Healthcare**
 - Contactless Heartrate Monitoring System
- **Hospitality**
 - Luggage Tracking and Management System
- **Building Management**
 - Smart Energy Monitoring System
 - Environmental Monitoring

Design Services:

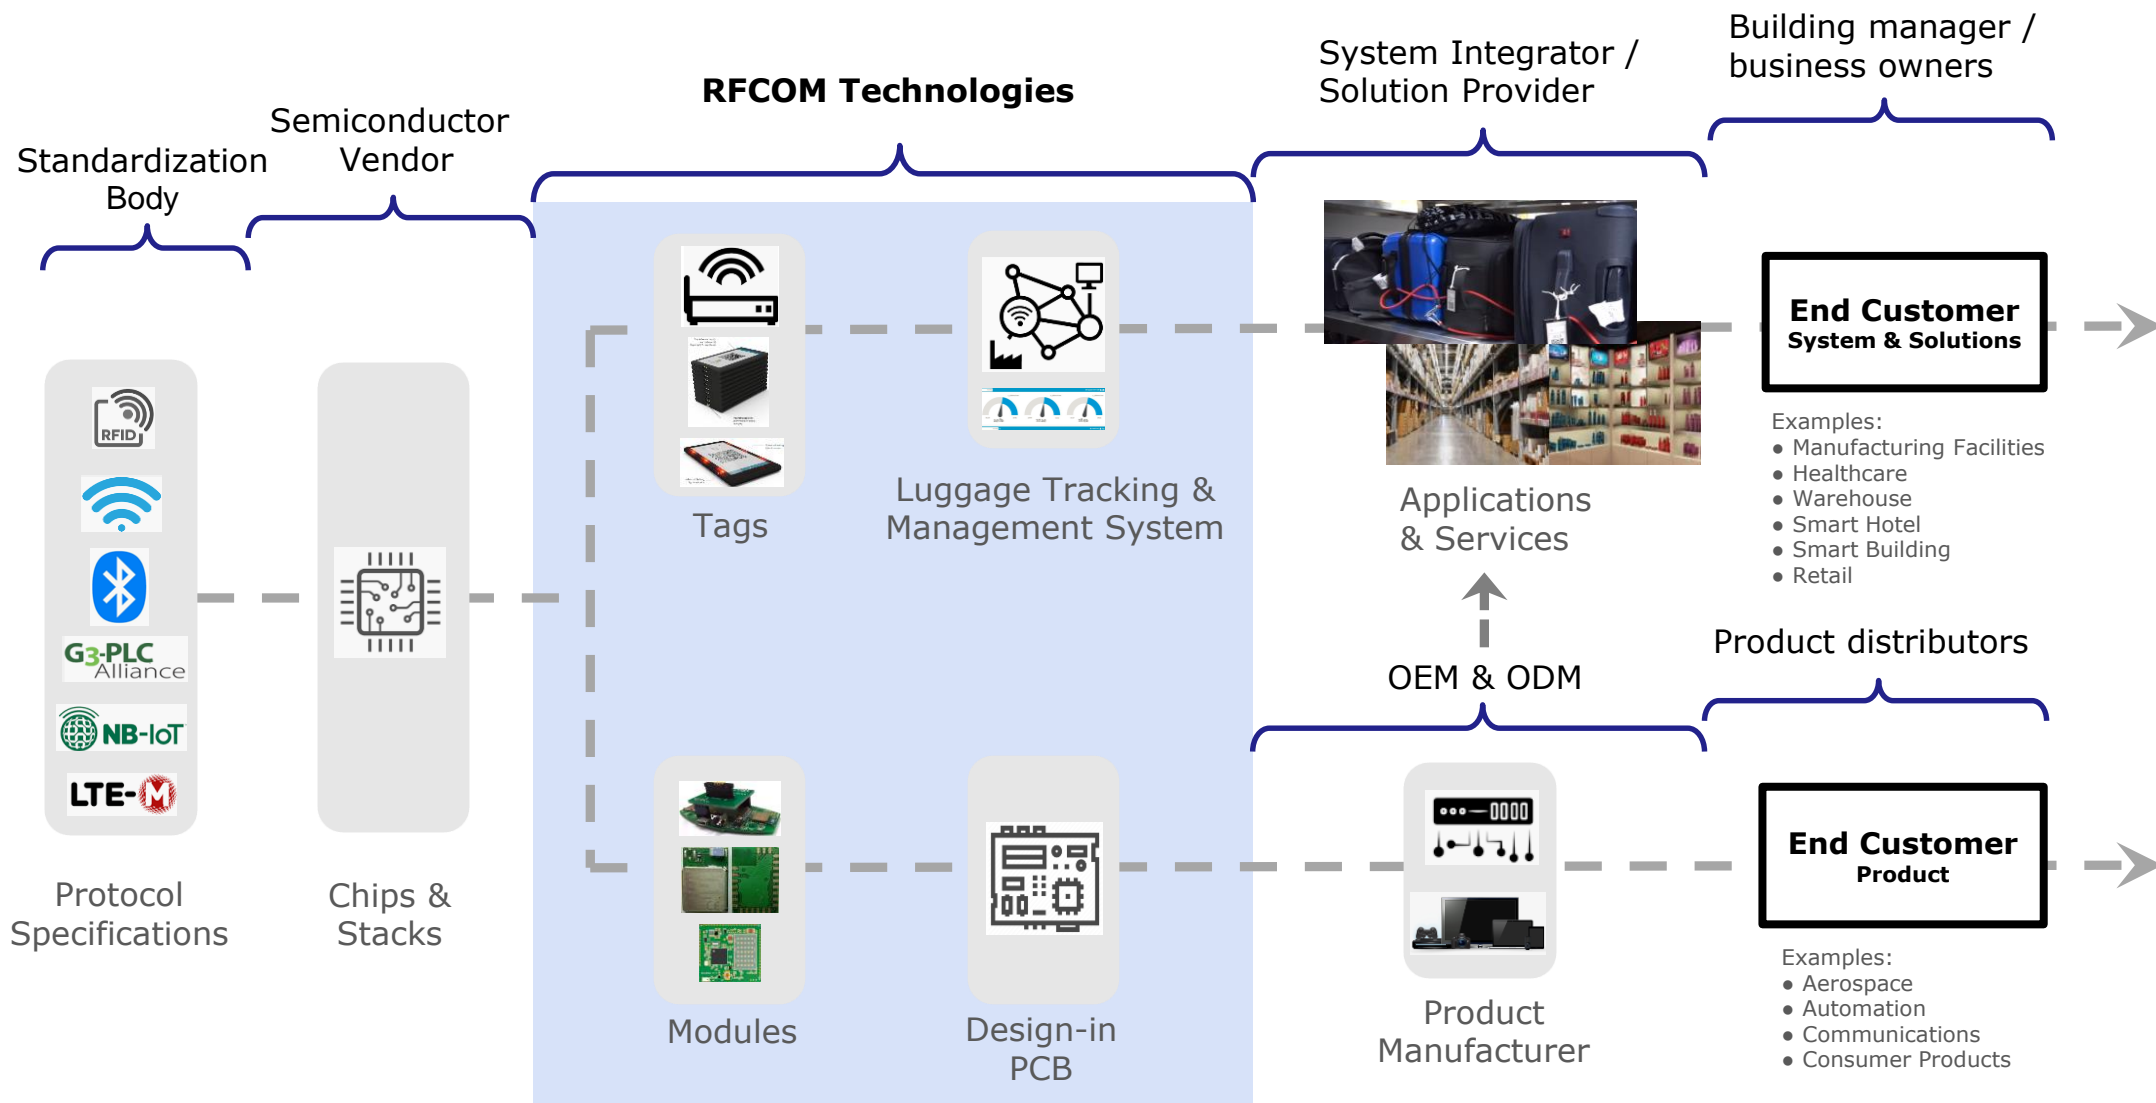

- Embedded communication board hardware and software development
- IoT application system development
- Supplier design-in support from chip selection

Our Value:

Strive to provide cost effective IoT/M2M connectivity solutions and cutting-edge wireless modem & module boards to our clients in industrial & aviation applications.
