

Consciously Building with Emerging Stories

Corporate Training & Coaching Brochure

CONSCIOUS EMERGENCE

ABOUT CONSCIOUS EMERGENCE

Mission:

To consciously maximize one's untapped potential for the community-at-large.

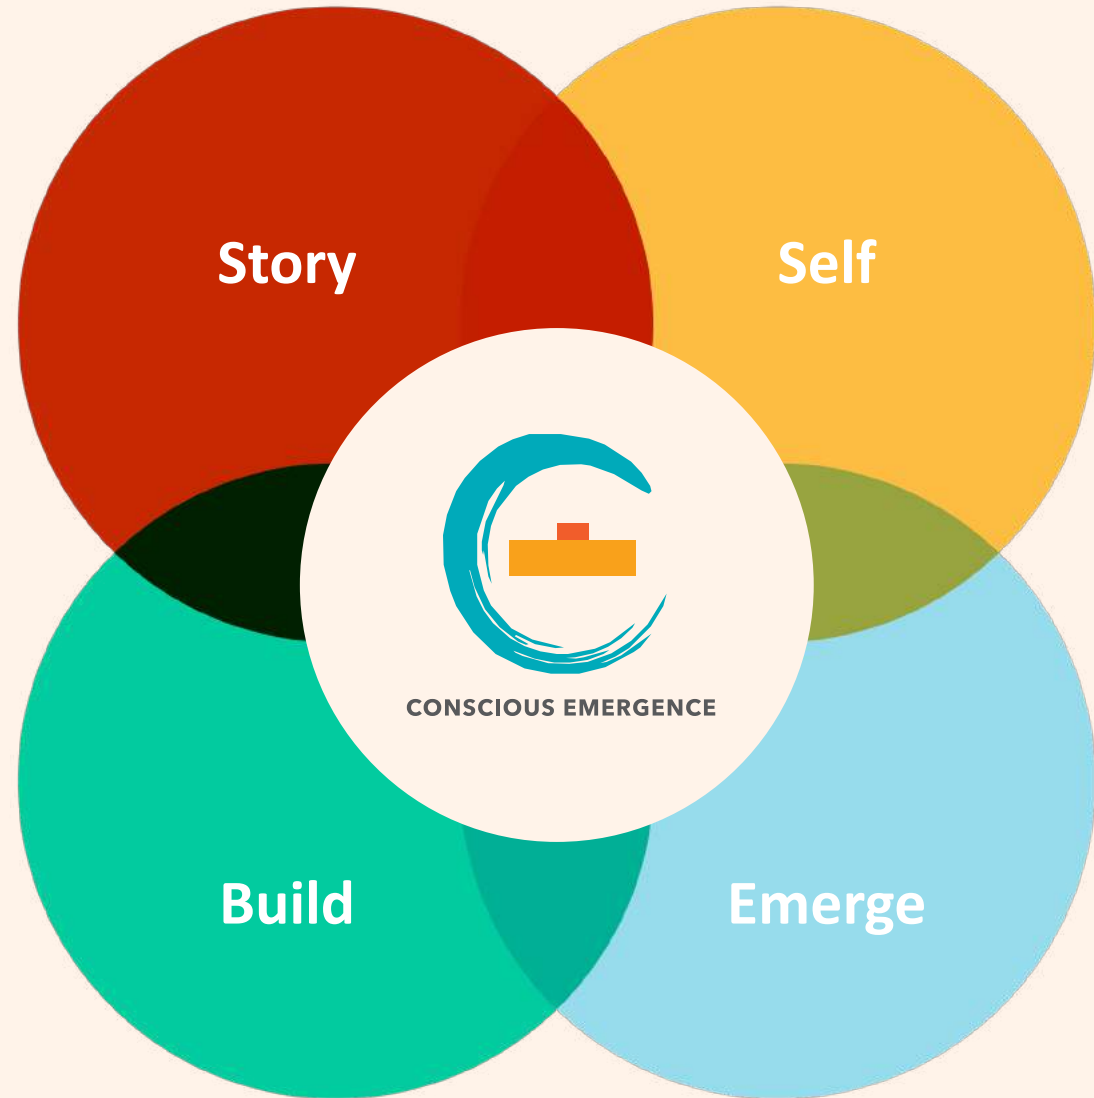

Vision:

To empower individuals and teams to be conscious and achieve their greatest potential.

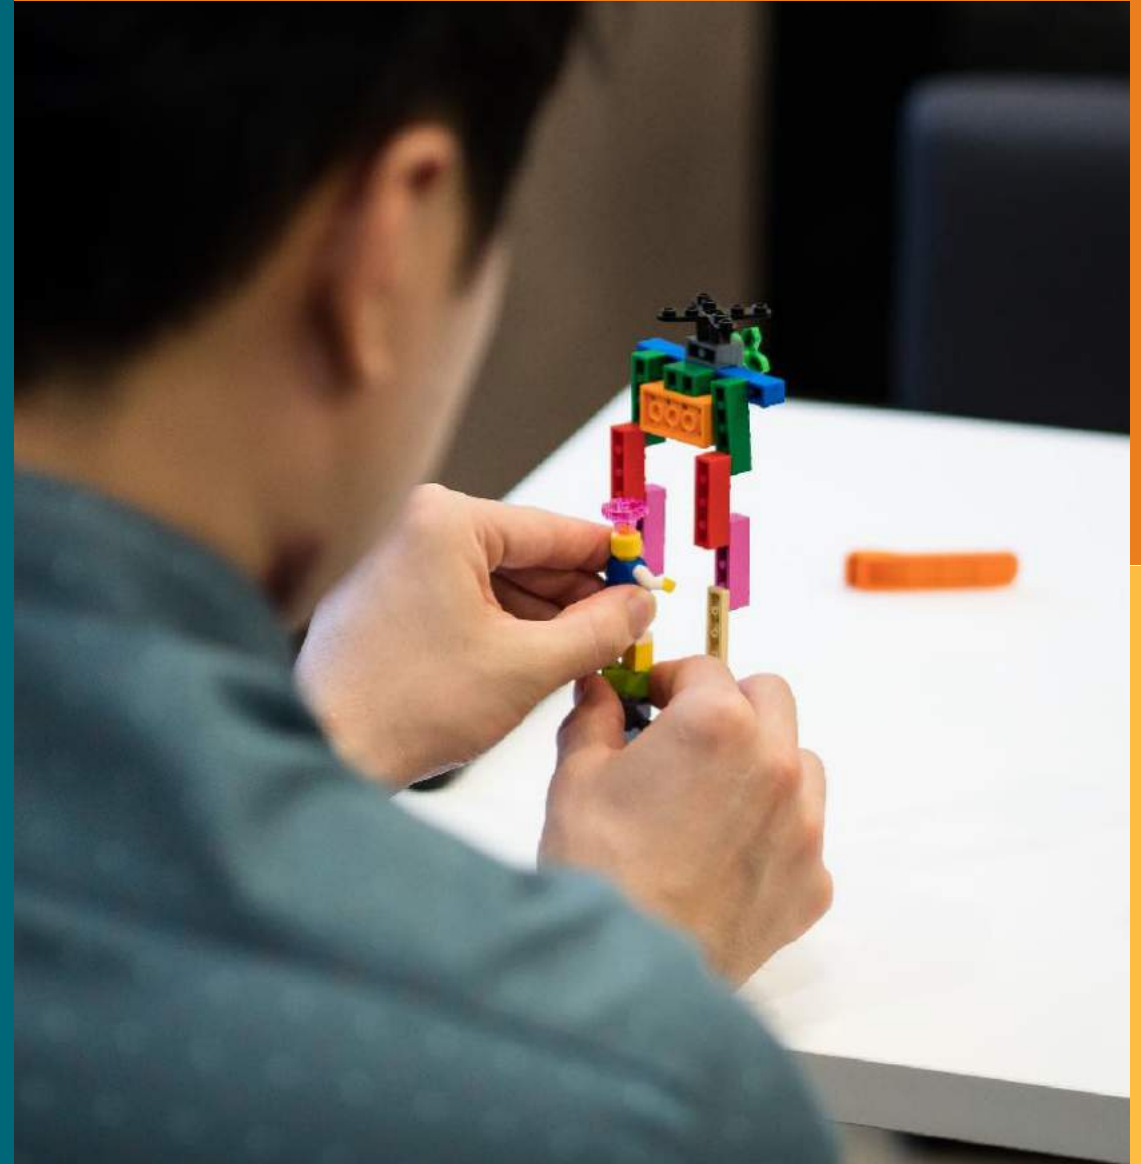

LEARNING FRAMEWORK™ OUR SUCCESS FORMULA

The Conscious Emergence Learning Framework™ looks at the state of mind in 4 components which are interlinked into each other.

Creativity and Innovation

In the VUCA world, there is no longer a 'one-size fits all' solution. Companies and individuals have to constantly improve themselves to become better. There is one possible solution which is through the use of LEGO® Bricks to help designer ideate the ideas through a series of trial and error to prototype their ideas.

SERVICES OF SPECIALISATIONS
(with LEGO™ SERIOUS PLAY™)

Team Building and Collaboration

In the cross-culture and cosmopolitan cities, companies are recruiting personnel from all walks of life, hence creating conflicts. Team building and team communication is therefore becoming more important to keep teams together through understanding each other in sharing their thoughts on the LEGO® Models.

Career Aspirations

In this world as we work together, most would have pursued a different occupation from what we actually studied in schools. However, when we talk about career aspirations, are we discovering our strengths to find the right job that we are looking for at this point of time?

This is where it is important to discover your career aspirations in the LEGO® Models.

Goal-Setting

Every year, we have to set our own goals to focus our passion into realistic objectives for our career progression. Goal Setting is essentially important because it helps individual to excel at the workplace yet staying happy in pursuing one's passion. This will be done with LEGO® Bricks

Self-Discovery

Identifying our strengths and our weakness is pertinent in identifying the positive traits required in living our dreams that we are intending to pursue. Self Discovery with the LEGO® Bricks will help us in the long run to show excellence in what we do.

Design Thinking

In the areas of Design Thinking, through the use of LEGO® Bricks, individuals and teams can come together to solve a complex issues which can only be done through a fixed process in defining, identifying the root cause, prototyping ideas and implementing new ideas.

What is the **LEGO® SERIOUS PLAY®** Method?

A facilitated meeting, communication and problem-solving method for teams developed in 1999 by Robert Rasmussen within LEGO® Group

“**LEGO SERIOUS PLAY** is about having enjoyment at work...**with more fun, more interest...more efficiently...so you have a better understanding of each other.**”

Mr Robert Rasmussen & Mr Per Kristiansen
Co-Founders of LEGO® SERIOUS PLAY®

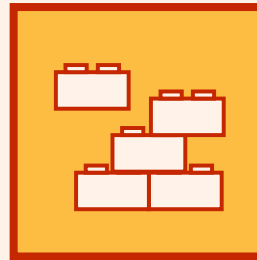

THE CORE PROCESS OF LEGO® SERIOUS PLAY® METHOD

Stage 1: The Facilitator Poses a Question

During this stage, participants will be asked to build and create stories in response to a question. The question will be very open-ended with clarity.

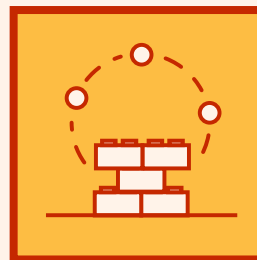

Stage 2: Participants Build a Model

By this stage, the participants will be spending some time in building a model in response to the question through the use of LEGO® bricks to create metaphors and stories

Stage 3: Participants share their Stories

During this stage, participants will share their stories and meanings of their 3D models. This gives 100% attention during the session. When they share their models, they make, the hand-mind connections.

Stage 4: Reflections

At the end of this stage, the facilitator will summarize their insights and asks clarification questions to the models to show how this activity connects to the workshop.

BENEFITS OF THE LEGO® SERIOUS PLAY® METHOD

100% participation

When you play with the LEGO bricks, you have the tendency to listen and lean closer to the table and observe your fellow participant's model.

Shared vision and systematic thinking

The shared vision would allow participants to have a bird's eye of the problem in hand and think systematically and strategically to solve it.

OUR CLIENTS

THOUGHTS FROM THE PARTICIPANTS

“It was an **enriching session!** Through the interactive exercises, I was able to **understand myself better** in terms of qualities and mindset. This allows me to **adjust accordingly** in the manner that I **manage my work** and **interact with others** personally and professionally. The trainer was also **engaging and entertaining** throughout the workshop, making it an **enjoyable experience.**”

Thomas Chen,
International Speaker, Trainer & Coach

“The thing I appreciated most about the experience was **seeing the connection between our thoughts n hands.** By using play, we had to force our thoughts to focus on a goal. It was a **fun and effective means to achieve a serious end**”

Miow Sen,
Realtor

“Fun and engaging”

Doreen Neo,
Retiree

THOUGHTS FROM THE PARTICIPANTS

“Gerald is a master trainer to **transform the culture of the team** through the use of Lego bricks. A must try for his service!”

Joe Wan,
Financial Services Manager

“**Very Informative**”

Joseph Tan,
Business Owner

“**Knowing thyself** can sometimes **be difficult**. Through the use of LEGO bricks, Gerald has helped me **realise myself better** and **gain clarity of my own thoughts.**”

Sabrina Cham,
Chartered Accountant (Singapore)

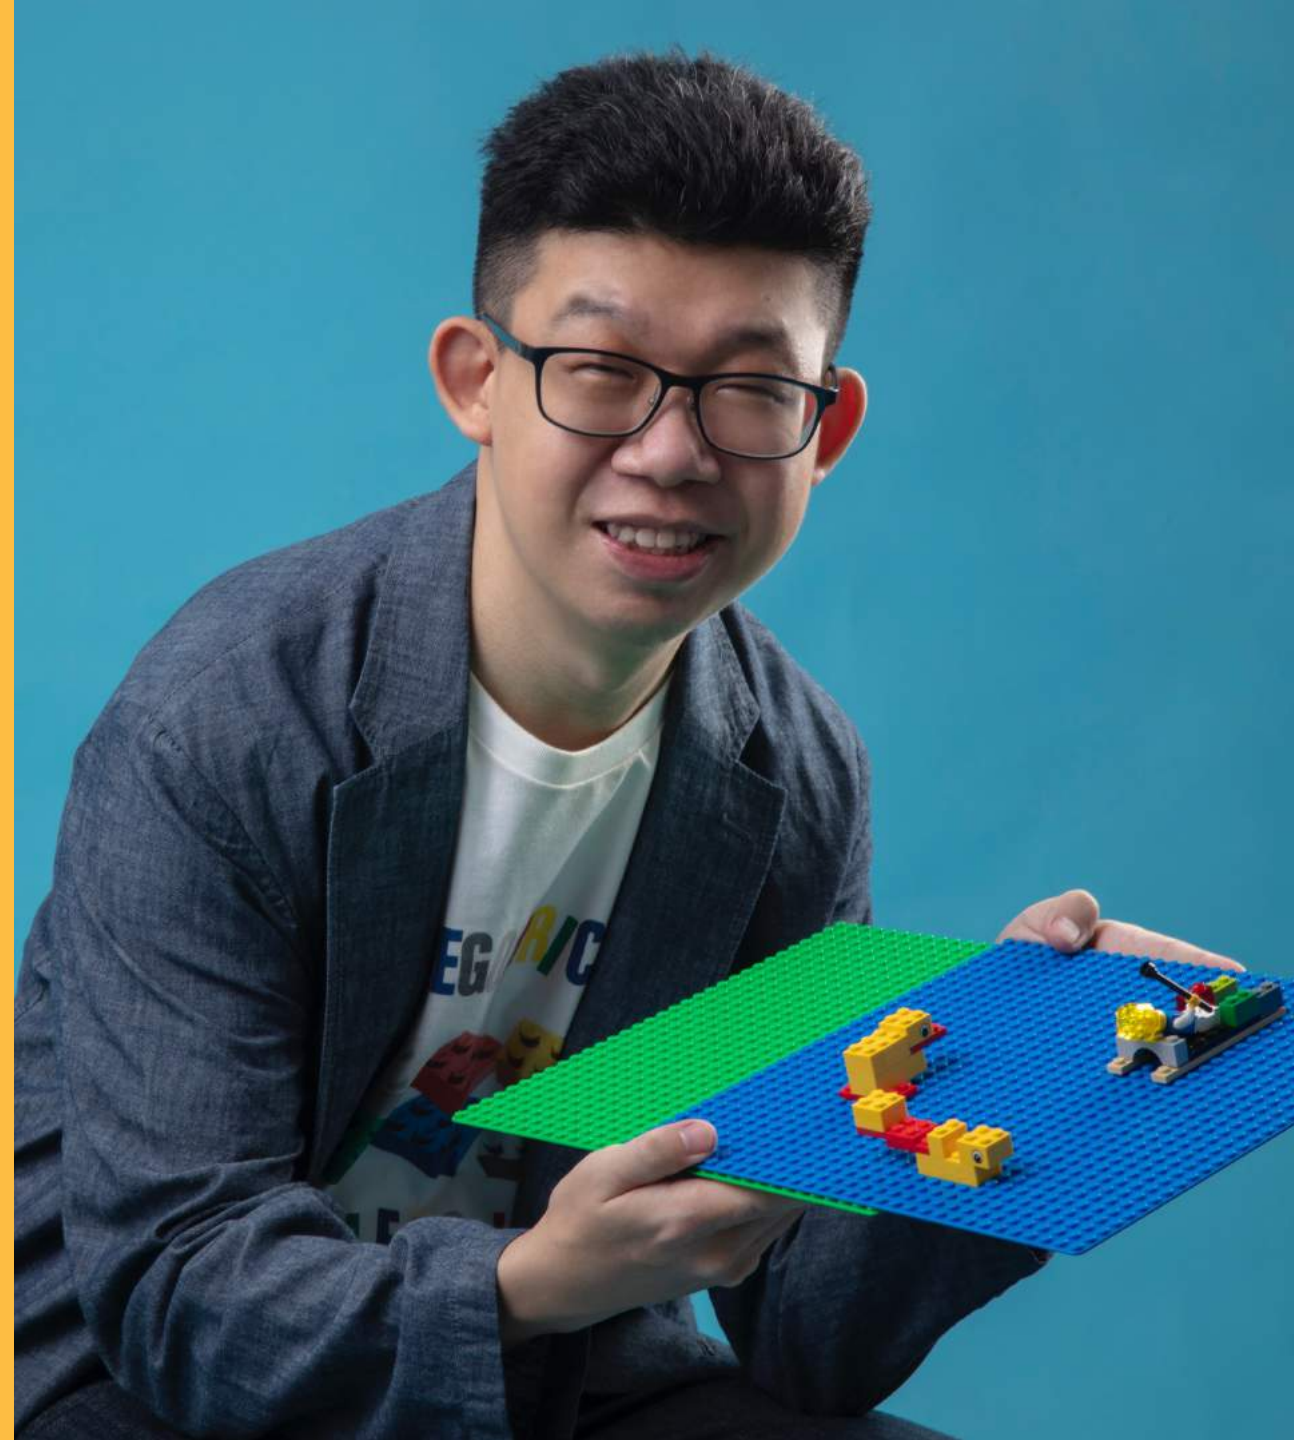

MR GERALD ONG

Our Expert Facilitator

Mr Gerald Ong, who uses LEGO® bricks to facilitate workshops to discover themselves and build teams together.

He had the opportunity to be trained by one of the world master trainers in the LEGO® SERIOUS PLAY® (LSP) method who have co-developed the methodology, Robert Rasmussen. Besides being interviewed live at MONEY 89.3FM, he contributes actively to newspapers, magazines, journals, conferences and symposiums in his expertise of the LEGO® SERIOUS PLAY® (LSP). Recently, he is privileged to be in Singapore Polytechnic Alumni Network (SPAN) March 2023 eMagazine.
