

## ACCELERATE THE DECARBONIZATION IN THE BUILT ENVIRONMENT WITH **BtrLyf'S**

### BtrLyf Digital Platform for Green Building

BtrLyf is a dynamic and rapidly expanding organization at the forefront of driving sustainable transformation through cutting-edge technology solutions.

With expertise in Digital Platforms that encompass the ability to assess any building remotely, anywhere, and anytime, all at a remarkably low cost, and leveraging AI-ML-based analytics engines, BtrLyf is driving a revolution in various industries through its groundbreaking approach.

## Enable Sustainable Co-creation & Digital Collaboration

### Transformative Collaboration:

BtrLyf brings together stakeholders from various sectors onto a unified platform, fostering collaboration among building owners, managers, consultants, technology providers, and more. This transformative collaboration accelerates the journey toward sustainable solutions by leveraging collective expertise

### AI-Enabled Insights:

Our AI-powered analytics engines within BtrLyf provide deep insights into green building projects and retrofit opportunities. By analyzing data from multiple sources, including open-source information and API-linked data, we empower decision-makers to make informed choices, ensuring energy-efficient and eco-friendly outcomes.

### Digital Twin Innovation:

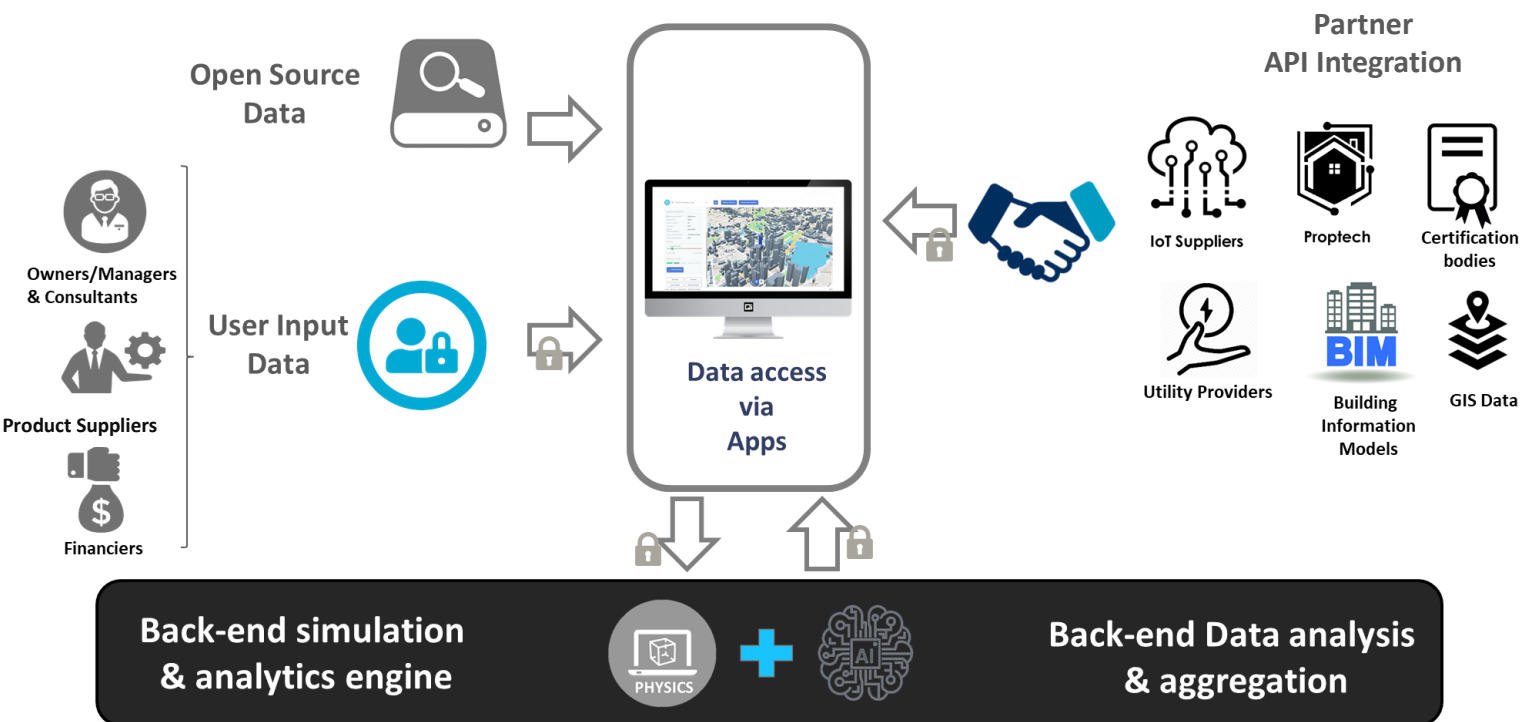

With BtrLyf, we create accessible 'Digital Twins' of buildings – virtual replicas that facilitate detailed assessments. These digital twins revolutionize the way projects are planned, offering an environment for testing solutions virtually and optimizing resources before implementation.

### Empowering Sustainability Champions:

BtrLyf empowers sustainability champions with a curated platform, BtrLyf-LISA. This Listing of Industry Specialist App fosters connections, enables knowledge sharing, and provides a hub for experts to showcase solutions, projects, and events, ultimately amplifying the impact of sustainable initiatives.

## How does it work

## WHO NEEDS BtrLyf

Building Owner / Manager

Consultants / Experts

Green Financier

Product Supplier

## BENEFITS

Swift and Economical Evaluations

Ongoing Enhancements for Performance

Unbiased Evaluation and Matched Solutions

Direct Insight through Quantification & Validation

Comprehensive Urban Data Insights for Stakeholders

Seamless Data Accessibility at Project Stages

## SOLUTIONS

### EDGAR: Enhanced Digital Green Assessor

EDGAR, or Enhanced Digital Green Assessor, is an advanced BtrLyf tool that streamlines green building assessments. With EDGAR, enjoy quick and affordable evaluations, benchmark your building's performance, and receive energy conservation advice to boost efficiency. Make informed sustainability decisions effortlessly with EDGAR's data-driven insights.

<https://www.btrlyf.com/edgar>

### PRIA: Product Inclusion in Assessment

PRIA, short for Product Inclusion in Assessment, empowers suppliers with a unique BtrLyf solution. Simulate your products' impact on buildings, evaluate their fit, and gain city-wide market analytics. PRIA enables you to showcase your offerings as integral components of sustainable solutions, expanding your reach in the green market.

### LISA: Listing of Industry Specialists by Area

LISA, Listing of Industry Specialists by Area, is your gateway to a network of sustainability champions. Discover innovative solutions, projects, and products while generating leads and connecting with experts. LISA connects like-minded professionals, propelling collaborative efforts toward a greener future.
