of Envcares Pte Ltd

Envcares

- a leader in Singapore's industrial/commercial B2B waste management
 - Founded 2014 by an experienced food waste specialist
 - Collecting and processing pre-consumer industrial/commercial non domestic waste/side streams
 - Reprocessing/ repurposing into useful products and advocating the green economy
 - A trusted custodian and processor of clients side streams

Sustainability journey: to massively regenerate resources

Premises: 8,000m² facility with 5,000m² covered factory space

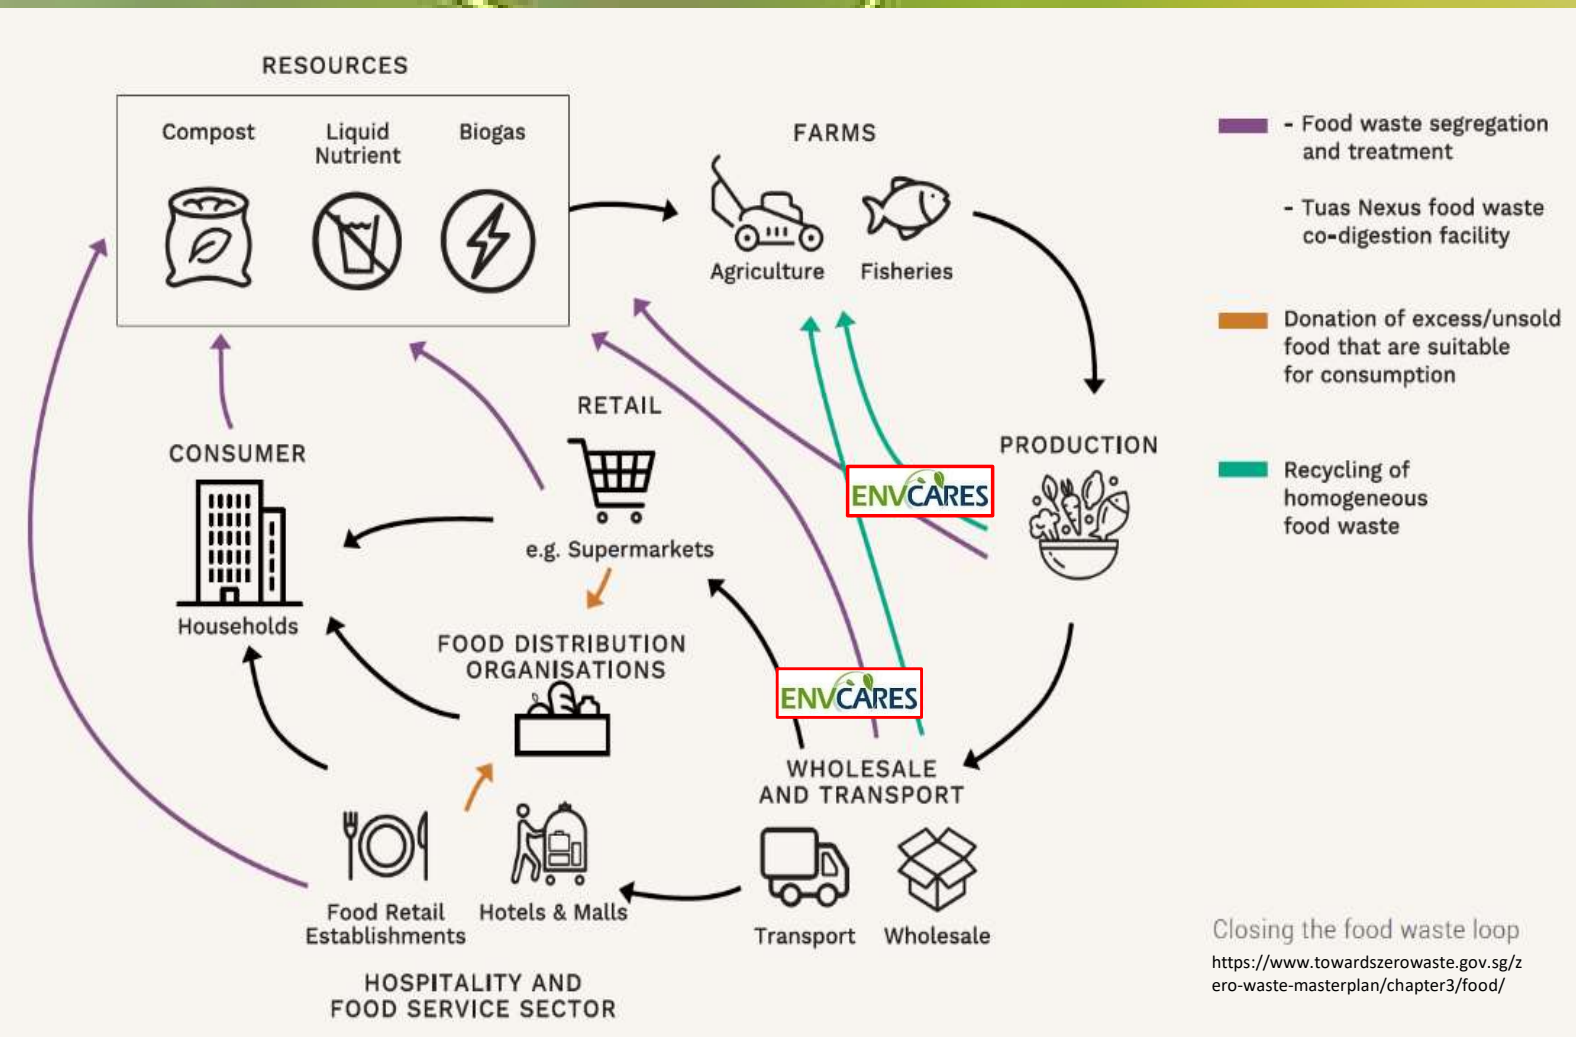

NEA Licensed Waste Collector: - Licensed to take in and process 500 tonnes/day with storage capacity of 800tonnes.

- Class A. Inorganic waste and Recyclable
- Class B. Organic waste and Recyclables
- Approved as a recycling facility including for e-wastes

SFA license as approved animal feed manufacturer

Average recycling rate of 80%

Closing the Organic Waste Loop – from linear to circularity

Envcares:

- Sources from a wide range of activities across multiple sectors.

- Expertise in large scale collection, logistics and conversion of wastes to useful resources

- Constantly generating virtuous circles of sustainability

- An originator in carbon reduction

Envcares: Sustainability-as-a-Service

- One stop centre for industrial and commercial waste streams
- In-house logistics capabilities
- Value Added Multiple green products
- Experienced and highly efficient workforce

Organic Compost - In-vessel Aerobic Thermophilic Process, promoting care of the environment in Singapore through the conversion of organic wastes into organic resources, significantly reducing the use of chemical fertilizers and avoiding the generation of chemical pollutants.

A philosophy centered on the production and development of natural compost at low cost by seeking and utilizing only organic waste materials through our proven and optimized processes.

- developing, growing and demonstrating that a virtuous cycle of circularity and sustainability is achievable.

Standards/Recognition:

ISO 9001:2015; 14001:2015; ISO 45001:2018

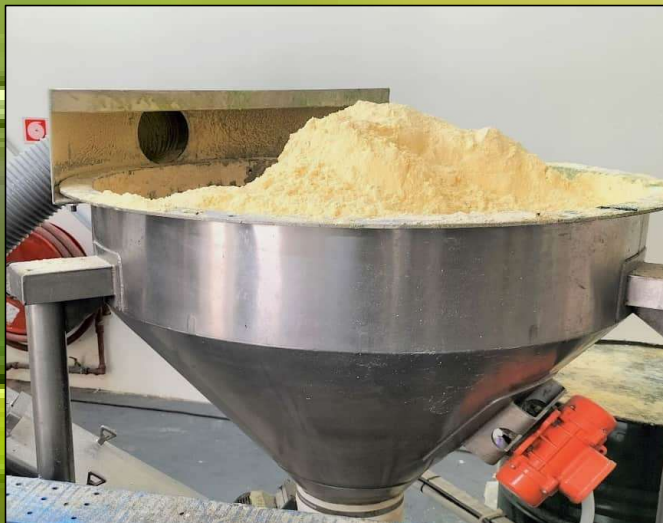

Envcares Beliefs and Guiding Principles

Aligns with UN

- Regenerating Resources, Protecting our Environment
- Sustainability Practices, Extending Current Resources for the Future
- Engaging and Collaborating with Sustainability Stakeholders and the Public
- Going Green, beyond Recycling with Regeneration to “Cradle to Cradle.”
- With our experiences, Wasted but Not Waste. Waste is not Waste

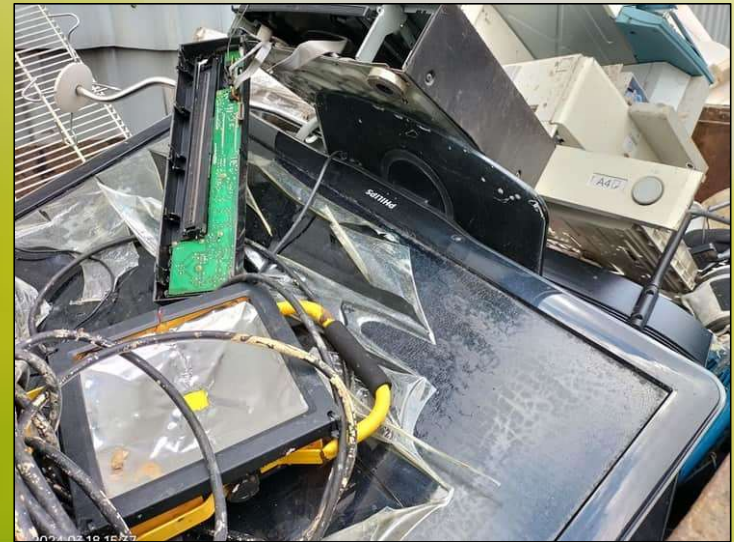

Facilities and Organic Materials

Electrical and Electronic Wastes

Used Sand Grit Trommeling

Sand Grit Washer

High Capacity Crushers

Business Case. Industrial & Commercial Solutions

1. Recyclable wastes

- Envcares has decades experiences in recycling industrial & commercial wastes into useful products

2. General waste

- Very large covered areas for sorting, clearing and recycling general wastes

3. Mud/Clayey Soils

- Envcares has sufficient water tight open top containers to safely transport materials with high moisture content.
- Compatible mix with compost

4. Copper slag

- Ability to transport huge quantities quickly and transform into clean aggregate for use in ready mix eco concrete
- Management and workforce are experienced in processing used copper slag
